AI SUPPORT QUALITY ANALYST | AI WORKFLOW AUTOMATION | CUSTOMER EXPERIENCE OPERATIONS | PMO

Customer-focused implementation and project management professional with experience across enterprise technology delivery, SaaS-style onboarding, customer support operations, business analysis, documentation, and AI-enabled workflow automation. Strong fit for AI Support Quality and Automated Customer Experience roles requiring interaction review, escalation analysis, QA trend identification, policy adherence monitoring, and cross-functional improvement of AI agent behavior.

Hands-on experience building and documenting AI workflows using n8n, Claude, Gemini Search, Google Workspace, and Hermes, including multi-agent workflows, CRM automation, reporting pipelines, and guardrail-focused agent prompts. Known for translating business and customer problems into clear workflows, SOPs, risk controls, training materials, and operational reporting that teams can adopt.

CORE SKILLS

- ? AI agent quality review and conversational evaluation
- ? AI workflow automation using n8n, Claude, Gemini Search, ChatGPT, Microsoft Copilot, Hermes, and Zapier
- ? Customer support operations, customer onboarding, and issue escalation
- ? QA, UAT, release validation, configuration support, and implementation testing
- ? Policy adherence, risk identification, documentation, and governance-aware AI adoption
- ? Operational reporting, KPI tracking, executive reporting, dashboards, and trend analysis
- ? Process improvement, workflow mapping, SOPs, user guides, and knowledge base content
- ? Cross-functional collaboration with Product, Operations, Engineering, vendors, and business stakeholders
- ? Project governance, RAID logs, stakeholder communications, change control, and go-live support
- ? CRM and platform exposure including Salesforce, ServiceNow, Google Workspace, Microsoft 365, Jira, Asana, Monday.com, Trello, and Microsoft Project

SELECTED AI PROJECTS

Independent AI Workflow Automation Portfolio

January 2026 - Present

- ? Built a portfolio of AI-enabled workflow automation projects focused on reducing manual effort, improving data flow, strengthening operational consistency, and supporting practical AI adoption for non-technical teams.
- ? Designed an AI Workflow Automation engagement using the 4A AI Efficiency Method: Assess, Align, Automate, and Adopt.
- ? Created AI workflow assessment frameworks to identify automation opportunities based on repetition, customer/business impact, data readiness, operational risk, and adoption effort.
- ? Developed a Super.com-targeted AI Support QA portfolio landing page showcasing AI workflow automation, n8n agents, Claude analytics pipelines, and AI quality review frameworks.
- ? Built a sample AI Support QA scorecard to evaluate intent recognition, policy adherence, resolution quality, escalation handling, conversation quality, hallucination risk, and business insight capture.
- ? Evaluated AI tools including Claude, ChatGPT, Microsoft Copilot, Gemini Search, n8n, Zapier, and Hermes for practical business and customer support applications.
- ? Pursuing AI Governance Professional (AIGP) certification to strengthen responsible AI, risk, and governance awareness.

Claude Monthly Sales Analytics Pipeline

- ? Built a repeatable Claude-assisted analytics pipeline that cleans monthly sales and inventory CSV files, standardizes order IDs and SKUs, merges datasets, validates row matching, and produces summary outputs.
- ? Generated KPI reporting by product, category, and customer, including orders, revenue, cost, gross profit, margin percentage, top products, top categories, and top customers.
- ? Produced HTML dashboards and executive PowerPoint summaries to support operational monitoring and leadership review.
- ? Demonstrates ability to build scalable automated reporting frameworks relevant to AI support quality monitoring, CSAT trend analysis, containment tracking, and operational risk reporting.

n8n MCP CRM Agent with Google Sheets CRUD

- ? Built a two-workflow n8n AI system using a user-facing AI Agent, memory, MCP Client, and MCP Server workflow to create, read, update, and delete CRM records in Google Sheets.
- ? Designed safety rules requiring the agent to retrieve rows before update/delete actions and use email as a unique identifier to reduce incorrect record changes.
- ? Documented system prompts, node sequence, test prompts, production safeguards, and extension opportunities.
- ? Relevant to AI support operations because it demonstrates tool-use guardrails, customer data handling, escalation logic, and auditability for AI agents acting on operational records.

PORR Multi-Agent Decision Workflow

- ? Built a Problem -> Options -> Risks -> Recommendation multi-agent workflow in n8n using Gemini Search, OpenRouter models, agent tools, memory, and Google Docs output.
- ? Designed agent prompts requiring search grounding and restricting unsupported assumptions, invented examples, or unverified recommendations.
- ? Structured final outputs into clear sections for problem definition, options, risks, and recommendation.
- ? Relevant to AI quality assurance because it mirrors interaction review workflows that identify policy gaps, reasoning failures, risk areas, and improvement opportunities.

Multi-Agent Stock Analysis Workflow

- ? Built an n8n multi-agent stock analysis system where an orchestrator coordinates Fundamental Analysis and Technical Analysis agents before synthesizing a final view.
- ? Required both specialist agents to use search before responding, reducing stale or hallucinated responses.
- ? Designed structured outputs including key findings, market sentiment, trend, support/resistance, indicator signals, and final summary.
- ? Demonstrates multi-perspective review, current-data grounding, and structured AI output evaluation.

PROFESSIONAL EXPERIENCE

Wipro Ltd, Toronto, ON

PM / Technology Consultant - GTAA Account, Toronto Pearson International Airport
January 2022 - August 2025

- ? Managed multiple concurrent enterprise technology and operational initiatives supporting Toronto Pearson International Airport, overseeing scope, timelines, governance, risk management, stakeholder communications, dependencies, and operational delivery.
- ? Served as the primary liaison between business stakeholders, technical teams, vendors, and operational leadership to align requirements, milestones, risks, and implementation decisions.
- ? Led end-to-end onboarding and implementation activities including setup, configuration coordination, testing, user training, documentation, early adoption support, and go-live readiness.
- ? Managed project governance including RAID logs, status reporting, action trackers, milestone tracking, steering committee updates, project health reviews, and executive communications.

- ? Proactively identified risks, escalated issues, coordinated mitigation plans, and maintained delivery momentum across high-priority initiatives.
- ? Delivered onboarding and training support for users to improve adoption of business systems and operational processes.
- ? Led customer-facing meetings, documented decisions and action items, and translated stakeholder needs into clear next steps for technical and business teams.
- ? Supported PMO activities as backup to the PMO Lead, including portfolio governance, reporting, resource coordination, and delivery best practices.
- ? Managed scope changes through structured change control while maintaining stakeholder alignment and minimizing delivery disruption.
- ? Conducted lessons-learned sessions and implemented continuous process improvements across project delivery.
- ? Recognized as the most outstanding Project Manager for the GTAA account after successful delivery of a critical airport initiative; received a merit salary increase and promotion to Consultant.

Toronto Metropolitan University, Ted Rogers School of Management | Diversity Institute, Toronto, ON

Data Analyst & Project Coordinator

November 2020 - December 2021

- ? Led vendor onboarding as the main point of contact, providing guidance, resolving inquiries, and improving onboarding clarity for internal and external stakeholders.
- ? Developed user guides, process documentation, and training materials to improve onboarding efficiency, process consistency, and user experience.
- ? Collaborated with legal and procurement teams on vendor contracts, procurement activities, RFP templates, vendor oversight, and payment processing.
- ? Managed stakeholder coordination, project tracking, reporting, scheduling, and operational workflows across multiple DEI-focused initiatives and program streams.
- ? Built reporting trackers to monitor funding allocations, budget utilization, project deliverables, and quarterly projections.
- ? Trained staff on procurement workflows, contract processes, reporting procedures, and operational documentation.

Priority Car Financing, North York, ON

Credit Analyst & Customer Support

May 2019 - October 2020

- ? Reviewed customer credit applications, supporting documentation, eligibility requirements, and case details to determine appropriate lending outcomes.
- ? Investigated discrepancies and gathered additional information from clients, dealerships, and lending partners to support accurate decision-making.
- ? Maintained detailed electronic records and documentation while ensuring accuracy, confidentiality, and compliance with organizational policies.
- ? Managed relationships with more than 40 automotive dealers and acted as a key point of contact for inquiries, issue resolution, and case follow-up.
- ? Communicated complex financial decisions, requirements, and next steps clearly to clients and stakeholders.
- ? Worked in a regulated environment requiring attention to detail, policy adherence, documentation accuracy, and customer trust.
- ? Improved client and partner satisfaction through timely communication, accurate assessments, and effective issue resolution.

EDUCATION & CERTIFICATIONS

- ? Project Management Professional (PMP) Certification - 2025
- ? ServiceNow Micro-Certification - Completed 2025
- ? Salesforce Administrator Certification - In progress
- ? AI Governance Professional (AIGP) - In progress
- ? Ryerson University - Fundamentals of Project Management
- ? Canadian Securities Course (CSC) - Mutual Funds
- ? Rhodes University, South Africa - Bachelor of Social Science in Economics (Honours), Sociology, Organizational Psychology

- ? QuickBooks Accounting Software Certificate
- ? H&R Block Federal Income Tax for Canada Certificate
- ? IFRS 9 Financial Instruments

TECHNICAL TOOLS

AI and automation: n8n, Zapier, Claude, ChatGPT, Gemini Search, Microsoft Copilot, Hermes
CRM and platforms: Salesforce, ServiceNow, Google Sheets, Google Docs, Google Workspace, Microsoft 365
Project and workflow tools: Jira, Asana, Monday.com, Trello, Microsoft Project
Reporting and productivity: Excel, PowerPoint, Word, dashboards, trackers, executive reporting
